-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2833

1. This application has been examined. Claims 1-4 are pending in this application.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over applicant's admitted prior art (specification, pages 1-5 and figs. 4-6) in view of Polgar et al. (5,902,155).

As per claims 1-4, the applicant's admitted prior art in figs. 4-6 discloses the invention substantially as claimed except for a guide groove is formed in an inner side surface of the short fuse cavity and a guide rib fitting into the guide groove is formed on the outer side surface of the plug-in fuse. However, the use of such guide groove and guide rib is well known in the art as evidenced by Polgar. Polgar teaches a pair of guide ribs 54 fitting into the corresponding pair of guide grooves 38 (see figs. 11a-d).

Therefore, it would have been obvious to one skilled in the art at the time the invention was made to include the teaching of Polgar in the applicant's prior art as claimed in order to provide some form of polarizing means to ensure that the modular connector is inserted into the shroud in a particular orientation.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Xuong M. Chung-Trans whose telephone number is (571) 272-2002. The examiner can normally be reached on Monday-Friday.
